

Tutorial No : 2

Tutorial Title: Find out the sum of even numbers between 1 to 50 using loops.

Name of Student: Vikiraj Vadghane

Class: SY

Div: 2

PRN No:B25ET1200

Batch:C

Program:

```
#include <iostream>
using namespace std;

int main() {
    int sum_even = 0;
    int sum_odd = 0;

    for (int i = 0; i <= 50; i++) {
        if (i % 2 == 0) {
            sum_even = sum_even + i;
        } else {
            sum_odd = sum_odd + i;
        }
    }

    cout << "Sum of even numbers bet 1 to 50 :" << sum_even << endl;
    cout << "Sum of odd numbers bet 1 to 50 :" << sum_odd << endl;

    return 0;
}
```

Output:

```
Sum of even numbers bet 1 to 50 :650
Sum of odd numbers bet 1 to 50 :625
```

```
=== Code Execution Successful |===
